

lateralization in the nervous system

Fri, 07 Dec 2018 22:12:00 GMT lateralization in the nervous system pdf - Human reflexes. Myotatic reflexes. The myotatic reflexes (also known as deep tendon reflexes), provide information on the integrity of the central nervous system and peripheral nervous system. Generally, decreased reflexes indicate a peripheral problem, and lively or exaggerated reflexes a central one. Sat, 08 Dec 2018 03:13:00 GMT Reflex - Wikipedia - crash_course_study_guide_AP_Psych.doc 2 Neuropsychology I. THE NERVOUS SYSTEM The nervous system receives and transmits information. A. Central nervous system (CNS): consists of the brain and spinal cord. The brain is split into right and left Mon, 10 Dec 2018 10:56:00 GMT crash course study guide AP Psych - freewebs.com - The cerebrum is a large part of the brain containing the cerebral cortex (of the two cerebral hemispheres), as well as several subcortical structures, including the hippocampus, basal ganglia, and olfactory bulb. In the human brain, the cerebrum is the uppermost region of the central nervous system. The prosencephalon is the embryonic structure from which the cerebrum develops prenatally.
